

**CONNECTICUT CLEAN ENERGY COMMUNITIES PROGRAM
BRIGHT IDEA GRANT AWARD
WILTON CT**

\$10,000

Description of Energy-Saving Project

Insulation of the Historic "Yellow House" at Ambler Farm . In accordance with the Energy Audit performed by New England Smart Energy Group, LLC and the Home Performance with Energy Star Program.

Projected Electric Savings:

None

Projected Oil Savings:

947 gallons (calc. at \$3.75/gal.)

Estimated Start Date:

Spring 2014 - subject to approval of this grant usage and contractor scheduling

Estimated Completion Date:

Spring 2014 - three (3) weeks after Start date

Project Completion by which Company:

The project will be completed under the supervision of New England Smart Energy under the provisions of the Home Energy Performance with Energy Star Program. Another contractor approved by the program may be employed to do the actual work under their supervision. Their proposal and project out line is attached. This application is for the work described under the insulation portion.

Overall Project Costs:

Project costs, if work is done by New England Smart Energy (NESE), is \$20,045. This may be reduced if a different contractor , under the supervision of NESE, has a more competitive price. In any event the cost will be significantly greater the Grant amount.

Are you using entire Bright Idea Grant toward the funding of this project?

Yes

Are you participating in other Energy Efficiency Fund programs to finance the balance of this project?

Yes: CL&P Rebate under the Home Performance with Energy Star Program.

In addition, the Town of Wilton and the Ambler Farm will provide funds for completion of the Insulation portion.
